Seminar

Scholarship Opportunities for International Undergraduates, Graduate, Postdocs and Professors/Scholars offered by the German Academic Exchange Service (DAAD)

by

Dr. Thian Yew Gan
Professor of University of Alberta
DAAD Research Ambassador (Since 2011)
Guest University Professor (W3) of Technical University of Munich & DAAD Visiting Professor (2006-07)
Visiting Scholar, United Nation University (UNU-FLORES), Dresden, Germany (2013)
Visiting Professor, Technical University Berlin (2015)

Abstract

Each year, over 20,000 foreigners (students, professionals and scholars) receive financial support from German funding organizations such as the German Academic Exchange Service (DAAD, Deutscher Akademischer Austausch Dienst), Alexander von Humboldt Foundation (AvH), German Research Foundation (DFG), Max Planck Society (MPG), Fraunhofer-Gesellschaft (FhG), Helmholtz Association and Leibniz Association, to study and to conduct collaborative research with German researchers/scientists/professors at universities and research institutions across Germany. This seminar will first give a general overview of higher education and research in Germany, which is Europe’s leading economy, and one of the world’s leading nations in scientific research and technology. Then, information will be provided on the opportunity for students of North America (Canada and USA) to advance their academic career via study visits or seminars, summer courses, internships, or research projects at graduate schools of Germany, and supported through scholarships, fellowships, research grants or work contracts, for durations ranging from several days to several years.

Venue
Lecture Theatre ETLC E1-001

Date: October 22 (Thursday), 2015  5:00-5:50 pm
