RE: Executive Nominations for VP Internal

To whom this may concern:

My name is Jakub Piwowarczyk and, my colleague, Ashton Martin and I wish to declare our co-candidacy for the 2018/2019 executive position of VP Internal for the Mechanical Engineering Club. I am entering my fifth year as a Mechanical/Biomedical Engineering Student and currently hold the position of VP Internal and IT Coordinator. Ever since I entered Mechanical Engineering, I have been a part of the Mechanical Engineering Club. I started as an Office Representative in my second year and moved up to VP Finance in my third year. Over these years, I have gained a lot of experience and knowledge on the inner workings of the Mechanical Engineering Club and have worked closely with the club presidents in managing the operations of the club.

Ashton Martin will be a fourth year Mechanical Engineering Student with the Biomed option for the Fall 2018/Winter 2019 semesters. Since the start of Fall 2017, he has held and currently holds the position for Food and BBQ representative. During his time in this role, Ashton has kept the Moose Lodge's food stocks at near capacity ensuring that the Club can offer quality foods at a more than affordable student budget. In addition, he organized and ran three successful BBQ events for the Club (two public events and one private). On top of fulfilling his assigned duties, Ashton continually assists in day-to-day club affairs and events as well as representing the Mechanical Engineering students on the new Engineering Garage Committee.

One of the biggest things that we would like to stress next year, if we are elected as co-Vice Presidents, is to ensure that many more Mechanical Engineering students are not only aware that the club exists, but also aware of all the services that we offer. If you were to ask any of the thousand-plus students that are currently in Mechanical Engineering, many of them would say that they have never been to or even heard of the Mechanical Engineering Club. This is something that we would like to change, starting from the second-years that are entering Mechanical Engineering. Increasing the club's second-year recruitment activities will strengthen the club by creating a larger member base. This will ensure that the club stays strong for the years to come.

Overall, we feel that we are great candidates and through each of our own individual knowledge of and unique experiences with the club we believe that we can come together and ensure that the next year will be an even greater year for the club. On election day, we hope you will consider voting Jakub Piwowarczyk and Ashton Martin for VP Internals of the Mechanical Engineering Club. Thank you for your consideration.

Warmest regards,

Jakub Piwowarczyk

Ashton Martin
